The Tulip Collection Design Beyond Function

Copenhagen, 27/09/2024 – Copyright: Higham Copenhagen

We from Higham Copenhagen are proud to announce the launch of our latest addition to our portfolio of products: The Tulip Pendant. Available in two sizes.

The Poetry of Light

The Tulip Pendant tells a tale of nature and abstraction. Crafted from fine materials such as brass and mouth-blown opal glass from esteemed craft makers, each element is meticulously designed to elevate the design to its maximum potential. Its organic form reflects the gentle curves of a flower on the verge of blossoming, capturing the concentration of nature in its most delicate state and transcending it out of the ordinary into abstract form.

The Tulip Pendant lamp speaks to those who see beyond mere illumination. To those seeking depth and desire for meaning in the objects they surround themselves with.

“Truly original design is to defy the ordinary. Our Tulip Series does so with quiet confidence. It is not a product derived from trends or isms. It exists because it must—because its presence enriches the environment, transcending the functional to become a piece of poetry in light.” says Steen Higham & Bastian Higham, co-designers of the Tulip collection.

Premium Materials and Craftsmanship: Each Tulip lamp is made from solid brass or aluminum, with a mouthblown opal glass shade handcrafted in Europe. The lamp is then assembled in Denmark, ensuring the highest quality standards.

Design: Steen Higham & Bastian Higham
